Subject: RE: Request for Subcontracted Services - Canadian Radium and Uranium Site

No there is not. I asked each qualified bidder if there was any markup based on the Sunday work. One bidder did mark it up but not the lowest qualified bidder (EFS). They must be slow in terms of their work load because he did previously communicate that he would markup the quote for the weekend work.

**** External Email ****

Tim,
Is there any sort of extra charge associated with EFS bid for the weekend work?

Dan Gaughan

Subject: Request for Subcontracted Services - Canadian Radium and Uranium Site

Dan,
In accordance with the scope of work for the Canadian Radium and Uranium Site under TD No. 68HE0219F0032/0030, Weston is requesting your concurrence for a TD to provide private utility mark-out and Geoprobe® services as part of the subsurface soil investigation of the Site. The requested scope of work includes the advancement of up to 10 soil borings to a maximum depth of 8 feet bgs at locations throughout the investigation area (**please see the attached subcontract package**). The subcontracted services include personnel certified to perform hazardous waste work in accordance with OSHA 1910.120, required PPE, and private utility mark-out/Geoprobe equipment. **If you agree with this request, please email Michelle Tabayoyong, Mark Oldland, Bonnie Hriczko, and myself so a TD in the amount of \$6,500.00 can be issued.** If you have any questions or comments please let me know.

Thanks,

Timothy Benton, CHMM
